# Firefighter's belt PB 067

## with detachable safety lanyard LB 067

**Made in Poland**

Firefighter's belt PB 067 is a new restraint system (restraint) made of one piece of polyester strap connected by an aluminium buckle. The safety cord LB 067 is attached to the belt by means of a connecting link AZ 090. The safety cord is protected by a leather protective sleeve and ended with an aluminium snap lock according to EN 362 standard. The fire brigade belt PB 067 is a supplement to the equipment protecting against falls from height and is used to prevent falls during work.

**EN358/R – FIREFIGHTING BELT  
EN354 – SAFETY LANYARDS  
R – RESTRAINT SYSTEM  
(LIMITING)**
